Subject System Interfaces

Description of Problem or Suggestion:

Inadequate discussion of interfaces was provided, especially in the sense of a total view of their status. On the occasions in which EDOS and EBnet interfaces were brought up, it was evident that formal agreements had not been reached. This suggests incompleteness at a CDR level and implies unassessed design elements, if not risks.

Originator's Recommendation

Provide a complete list of system interface documentation (IRDs, ICDs) and status. Discuss risks of not having such agreements in place and planned dates for each required document.
